

## deleteSimulationDatasets

Delete simulation dataset from data/training and data/test path at once.

Created on November 25, 2020 by Tobias Wulf. Copyright Tobias Wulf 2020.

### Load Path to Clean Up

---

Load path from config.mat and where to find training and test datasets.

```
try
    clearvars;
    close all;
    load('config.mat', 'PathVariables')
    disp('Delete from ...')
    disp(PathVariables.trainingDataPath);
    disp(PathVariables.testDataPath);
catch ME
    rethrow(ME)
end
```

### Delete Datasets

---

Delete datasets from training dataset path and test dataset path with certain file pattern.

```
answer = removeFilesFromDir(PathVariables.trainingDataPath, '*.mat');
fprintf('Delete training datasets: %s\n', string(answer));
answer = removeFilesFromDir(PathVariables.testDataPath, '*.mat');
fprintf('Delete test datasets: %s\n', string(answer));
```

---
