

plotSimulationDatasetCircle

Search for available trainings or test dataset and plot dataset. Follow user input dialog to choose which dataset to plot. Save created plot to file. Filename same as dataset with attached info.

Syntax

```
plotSimulationDatasetCircle()
```

Description

plotSimulationDatasetCircle() plot training or test dataset which are located in data/test or data/training. The function list all datasets and the user must decide during user input dialog which dataset to plot. It loads path from config.mat and scans for file automatically.

Examples

```
plotSimulationDatasetCircle()
```

Input Arguments

None

Output Arguments

None

Requirements

- Other m-files required: None
- Subfunctions: None
- MAT-files required: config.mat
